## **DETAILED ACTION**

### ***Examiner's Amendment***

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
2. This application is in condition for allowance except for the presence of claims 63-99 non-elected without traverse. Accordingly, claims 63-99 have been cancelled.

### ***Allowable Subject Matter***

3. Claims 1-62 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach or render obvious a method for forming a recessed gate structure having all exclusive limitations as recited in claims 1, 13, 24, 44, and 55, comprising forming insulating columns over a semiconductor substrate, using adjacent insulating columns as a guide to form a trench within the semiconductor substrate between the adjacent insulating columns, forming a gate oxide on the bottom and sidewalls of the trench, and forming a conductive region over the gate oxide.

Art Unit: 2818

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Copies of the references are not being furnished with this Office Action per MPEP § 707.05(a).

U.S. Patent 6,635,534 to Madson discloses a method of manufacturing a trench MOSFET using selective growth epitaxy, comprising forming a dielectric pillar on a substrate, selectively forming a semiconductor layer around the dielectric pillar, and removing a predetermined length of the dielectric pillar to create a trench in the substrate
